JOIN THE MOVEMENT

Taking Clean in New Directions

More than 30-years ago, ProTeam gave the industry backpack vacuums and the freedom to clean without boundaries. Gone were the common restrictions of space and maneuverability. Then, after years devoted to improving power and filtration, ProTeam engineers once again turned their attention to ergonomics.

ProTeam knows that when cleaning pros feel better physically, they're more productive, and when their movement is less restricted they can clean better with less effort. The result is a new generation of backpack vacuums that are unequalled in maneuverability and comfort.

NEXT GENERATION OF CLEAN

*The filtration value of ProTeam's ProLevel Filtration System in this vacuum is achieved by the use of a multi-stage filtration system, including intercept micro filter, micro cloth filter, plastic cage with foam filter, and post-motor filter made from HEPA media, as tested per ASTM F3150.
